

R1_DEAD under the frozen kill mapping (heldout_spec sha256 535c2dd3):
structural precursors behave as volume/churn correlates. Reading test NOT_SUPPORTED.

Filled = frozen estimator for that metric; hollow = the other estimator.
Persistent-neighbour closure is CONFIRMED on held-out but its screen event-study CI includes 0;
the held-out control fallback added 70 screen never-controls; balance: H SMD 0.96 at k=0, 6/11 balance rows with |SMD| > 0.25.
Screen prediction check: dAUC -0.001 [-0.008, 0.006] (grouped CV, exp_5).
